3. Select 'Configure Digital ID' from the pop up.

Digital ID Configuration Required [X]

This signature field requires a digital signature identity.

Would you like to configure one now?

Help [Configure Digital ID] Cancel

3. Select 'Create a new Digital ID' and press continue.

Configure a Digital ID for signing [X]

A Digital ID is required to create a digital signature. The most secure Digital ID are issued by trusted Certificate authorities and are based on secure devices like smart card or token. Some are based on files.

You can also create a new Digital ID, but they provide a low level of identity assurance.

Select the type of Digital ID:

- Use a Signature Creation Device
Configure a smart card or token connected to your computer
- Use a Digital ID from a file
Import an existing Digital ID that you have obtained as a file
- Create a new Digital ID**
Create your self-signed Digital ID

[?] [Cancel] [Continue]

4. Select 'Save to File' and continue.

Select the destination of the new Digital ID ✕

Digital IDs are typically issued by trusted providers that assure the validity of the identity. Self-signed Digital ID may not provide the same level of assurance and may not be accepted in some use cases.

Consult with your recipients if this is an acceptable form of authentication.

Save to File
Save the Digital ID to a file in your computer

Save to Windows Certificate Store
Save the Digital ID to Windows Certificate Store to be shared with other applications

? Back Continue

5. Complete the required details: Name, Email Address and Country/Region and select continue.

Create a self-signed Digital ID ✕

Enter the identity information to be used for creating the self-signed Digital ID.

Digital IDs that are self-signed by individuals do not provide the assurance that the identity information is valid. For this reason they may not be accepted in some use cases.
